The fine & speciality chemicals exhibition

The Fine and Specialty Chemicals industry in India represents a \$30billion market, which is growing at 10 - 12 % annually - faster than the chemical sector as a whole. The industry not only serves the local market, but also the global one and is competitive in many areas, including China.

Over the past decade, Chemspec India has continued to develop and reinforce itself as the must-attend networking platform for both domestic and international buyers and sellers of Fine and Speciality Chemicals.

Participating companies at the fourteenth edition of Chemspec India represent diverse sectors of the chemical industry: Organic & Fine Chemicals, Active Pharmaceutical Ingredients (APIs), Drug Intermediates, Dyes & Pigments, Agrochemicals, Contract & Toll Manufacturing, Coatings, Cosmetic Chemicals / Ingredients, Pigments & Solvents, Surfactants, Laboratory Chemicals, and a host of Speciality Chemicals (Coating Additives, Catalysts, Enzymes etc.). Participating companies see India as a significant market, with great growth potential and seek new business opportunities. 2018 will also see a focus on Water Treatment Chemicals and the Wastewater Treatment Industry.

#### Supporting Organisations

Indian Chemical Council

INDIAN SPECIALITY CHEMICALS MANUFACTURERS' ASSOCIATION

Association of Small & Medium Chemical Manufacturers

## Co-Located Events

**ChemProTech India 2018**  
9<sup>th</sup> International Exhibition on  
Chemical Processing Technology,
